

# Rising Stars Integrated Preschool Program

**RCS Behavioral & Educational Consulting, in conjunction with Mini-Miracles Early Education & Child Care Center, is proud to announce the Rising Stars Integrated Preschool Program!**

Students ages 3-6 with a diagnosis of Autism receive an intensive and individualized program based on Applied Behavior Analysis (ABA) assessments and programming all within a fun, engaging and inclusive preschool setting with community peers. Our preschool curriculum meets and exceeds the standards of the Massachusetts Department of Education with an emphasis on language, socialization, play skills, and independence in addition to building a strong academic foundation. Individual goals and objectives are targeted for each child with autism based on their individual needs and taught using ABA. Progress is tracked and monitored daily through data collection and graphing. Full day and partial day opportunities are available and based on individual needs.

All students receive instruction by a 1:1 Behavior Therapist and program oversight/consultation from a Licensed Board Certified Behavior Analyst (BCBA-LABA).

RCS' Rising Stars Integrated Preschool Program is a great option for students with autism who require ABA therapy but benefit from instruction within an inclusive learning environment with peer models.

**RCS' Rising Stars Integrated Preschool Program offers ABA therapy within an inclusive learning facility as well as during pull-out sessions and qualifies to be covered by most insurance.**
